High-Performance Rubber Roll-Up Doors

PowerTec™ Series

High-Performance Doors PowerTec Series

PowerTec™ SR (Standard Rubber)

- Exclusive industrial-grade construction
- Springless engineering for low maintenance
- Heavy-duty SBR rubber panel with breakaway system
- Dual thru-beam photo eyes
- Wireless bottom bar reversing edge
- Maximum size to 30'W x 30'H
- Opening speed up to 48 ips

(Larger sizes may be available upon request.)

PowerTec™ Pro (Low Profile)

- Low profile, 3-1/2" guides for tight space requirements
- Exclusive industrial-grade construction
- Springless engineering for low maintenance
- Heavy-duty SBR rubber panel with breakaway system
- Dual thru-beam photo eyes
- Maximum size up to 18'W x 18'H
- Opening speed up to 18 ips

PowerTec™ SD (Standard Dock)

- Industrial-grade, springless design for dock applications
- Narrow side frame/head clearance requirements
- Heavy-duty SBR rubber panel with breakaway system
- Dual thru-beam photo eyes
- Maximum size up to 12'W x 12'H
- Opening speed up to 18 ips
- Manual model available

PowerTec™ MR (Manual Roll)

- Industrial-grade, low maintenance model
- Narrow side frame/head clearance requirements
- Manual chain hoist operation for low cycle applications
- Heavy-duty SBR rubber panel with breakaway system
- Maximum size up to 18'W x 18'H

High-Performance Technology

Durable Panel Material

- Heavy-duty SBR rubber panel with standard end locks for greater stability and performance
- Optional EPDM rubber material in blue or grey for aesthetic considerations
- Panel materials are puncture and rip resistant

Safety Focused

Barron can offer a full array of safety features to provide safeguards and assure operational standards.

- Dual thru-beam photo eyes
- Wireless bottom bar
- Breakaway system

Performance Under Control

Our next generation exclusive System 4® and BTA4 remote door controllers provide greater functionality and unprecedented efficiency for Barron doors. Featuring smart technology, easy installation and a standard NEMA 4X rated (or equivalent) enclosure.

Low Maintenance

- Specifically engineered for simplicity and for high-cycle environments, designed for day in day out use
- Assured operation without extensive ongoing maintenance
- Heavy-duty, durable components and construction

Lasting Reliability

- Springless design features no counterbalance wear parts
- Engineered to withstand the daily rigors of use and high operating cycles
- Custom manufactured for optimal fit and performance

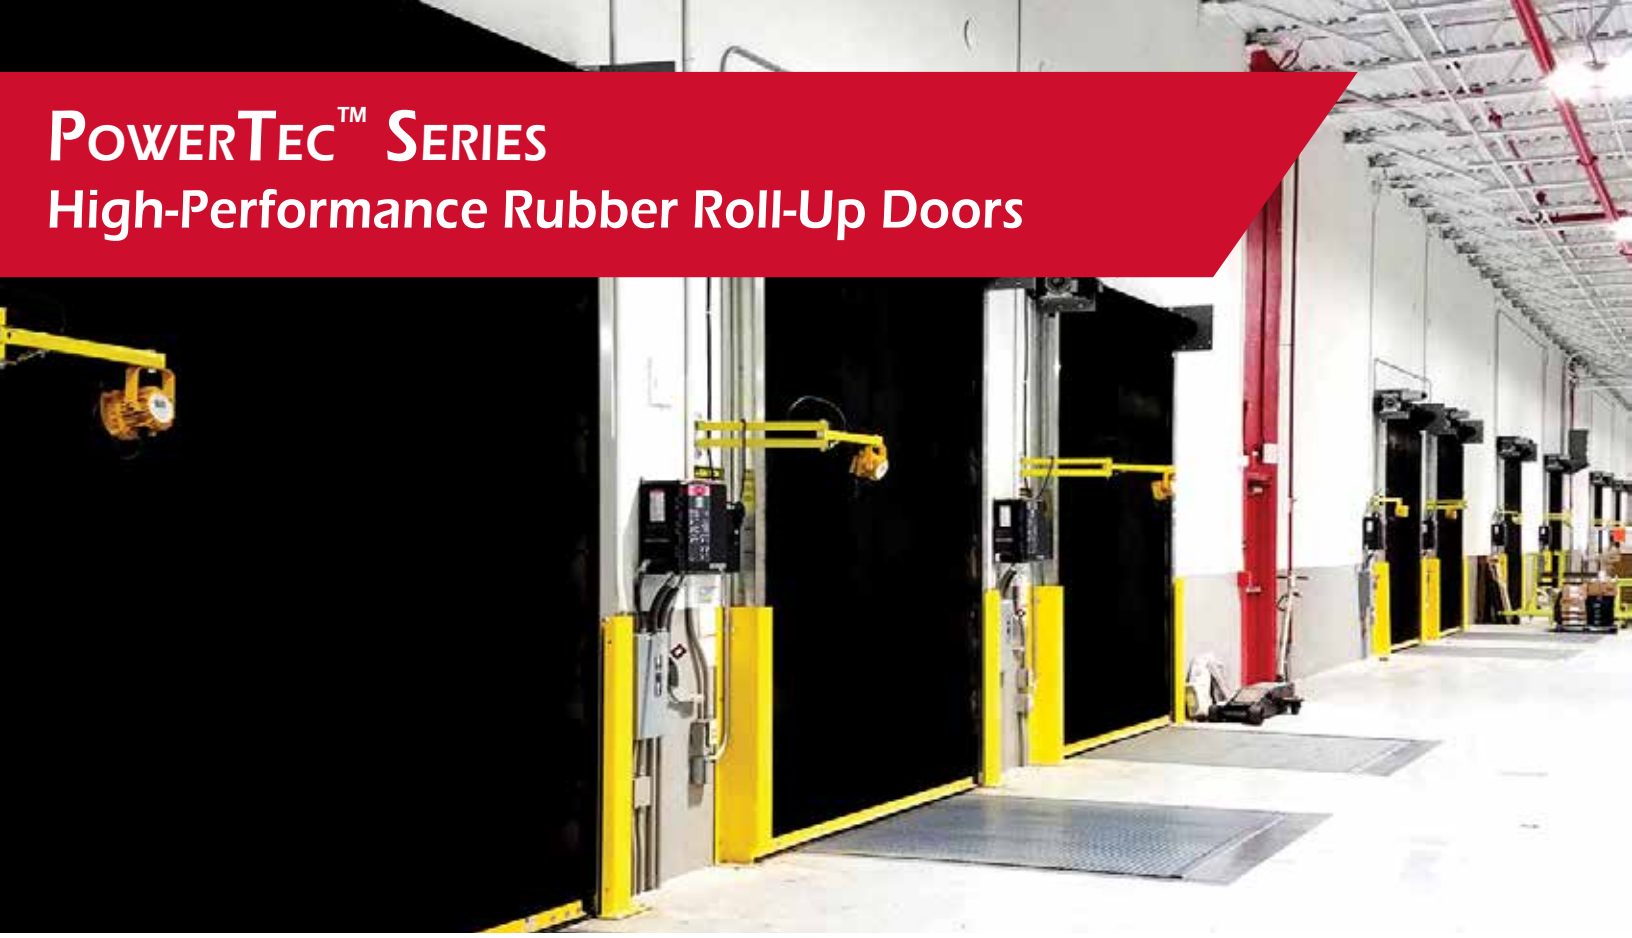
Increased Energy Efficiency

- Opening and closing speeds minimize air exchange and leads to better climate control
- Effective perimeter seals and thermal panels creates a more energy conscious environment

Applications & Industries

- Manufacturing/Distribution/Warehousing
- Transit/Heavy Equipment
- Parking/Automotive
- Government/Dock applications

PowerTec™ Series
High-Performance Rubber Roll-Up Doors



North America's Leading High-Performance Door Manufacturer

Quality. Performance. Reliability.

Barron doors offer our customers the highest value and day in, day out performance — and are supported by the knowledge and expertise of dedicated employees, authorized dealers and trained installers across North America. With over 150,000 doors in operation — many with millions of operating cycles — our doors provide energy savings, safety and security and require only minimal maintenance.
