

Logiflex - flexible handling of goods

High flexibility and efficiency - with only one truck, goods can be transported, lifted and handled in many different ways.

The design puts focus on the safety and ergonomic working conditions of the user - Logiflex can be adjusted to the individual user, and the ergonomic correct handle ensures the user a relaxed hold.

Optimum utilization of the space - Logiflex is of compact construction and is very maneuverable.

High quality is ensured through an extended test program and in cooperation with experts in Health and Safety.

LOGIFLEX LF MINI / ELF TRANS-STACKER & TRANS-POSITIONER

Technical Specifications

- Optimum safety for the user through
- central location of all control buttons on the handle
 - transparent and impact-resistant safety screen on the mast
 - location of parking brake

Strong construction ensures a long operating life and low maintenance costs.

Ergonomic handle ensures the user a relaxed hold. The handle can be marked with the name/department.

High maneuverability: Short overall length, large turning angle, assisted steering and low own weight.

Adjustable forks are standard for LF Mini and several ELF models.

Available with manual and electric lifting.
