Contact Us

Casters & Carts

Casters are a set of small wheels, free to swivel in any direction, fixed to the legs or base of a heavy piece of furniture so that it can be easily moved. Our casters are designed to make your job easier and more efficient. Our casters, wheels and floor locks are high quality and long-lasting and can withstand any kind of environment.

Above is our line of Blicke casters that work great in a hospital setting. They are made of high quality, corrosion and impact resistant synthetic material with nylon tread. These casters are often used on stretchers and laboratory and medical engineering equipment, as well as in clean rooms. These casters are available in multiple sizes and options, such as with or without brakes.

Casters & Carts

We often see casters used in hospitals specifically on hospital beds and all kinds of carts, as well as in cafeterias and storage rooms. In addition to providing casters, we can also provide carts, as well as custom carts to fit any application.

To see if our casters can make your job easier, schedule a complimentary caster survey today -- casters@barroneq.com.

Specialty Moving Equipment

Specialty moving equipment is a great way to keep your work space ergonomically friendly! There's a lot of movement going on in a hospital. Our specialty moving equipment can make those movements quicker and more efficient.

We often see our specialty moving equipment used in a hospital setting in the following applications:

- Moving linen carts
- Moving food carts
- Moving equipment
- Moving dumpsters
- Moving medication carts

Our Specialty Moving Equipment includes, but is not limited to the following products:

- Bed Movers
- Power Pushers
- Hand Carts
- Dollies
- Scissor Lifts
- Pallet Jacks

For more information about our Specialty Moving Equipment, email us at sales@barroenq.com.

Industrial/Commercial Doors

Overhead Doors are common in any large building where materials need to be moved in and out. At a hospital, we typically assist with high speed doors, impact doors, counter/shutter doors and overhead sectional doors. You can also convert your doors to "touch-free" with our motion sensors. We have sensors available for industrial doors and pedestrian doors. Another thing to remember -- we can service any kind of door, even if it didn't come from us. For more information on our overhead doors, email us at sales@barroneq.com or visit our website at www.barroneq.com.

Truck and Loading Dock Equipment

Not all hospitals have truck and loading dock equipment, but for the ones that do, it's important to make sure your equipment is safe and working efficiently.

At Barron Equipment & Overhead Doors, we carry only the very best truck and loading dock equipment on the market. From dock levelers, to dock seals & shelters, to dock lifts and bollards, to loading dock accessories, dock plates and truck restraints, we have anything you might need.

For more information on our truck and loading dock equipment, email us at sales@barroneq.com or visit our website at www.barroneq.com.

Storage Solutions

At Barron Equipment & Overhead Doors, we have a variety of storage solutions to help you manage your inventory better.

Our products include but are not limited to:

- Lockers
- Cabinets
- Racking & Shelving
- Wire Mesh Enclosures
- Bins

In addition to these storage solutions, we also can provide custom locks to make sure everything stays safe and secure.

For more information about our storage solutions, visit our website at barroneq.com or email us at sales@barroneq.com.

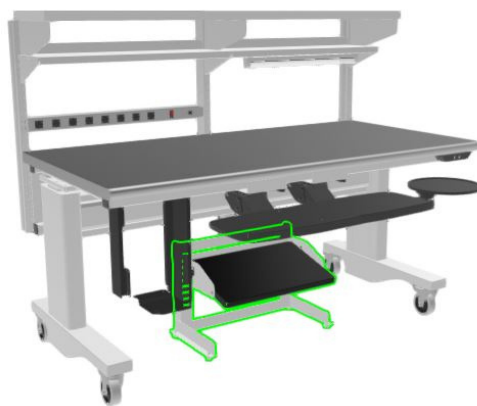

Work Stations & Seating

At Barron Equipment & Overhead Doors, we believe having appropriate, ergonomically friendly work stations and seating creates a more productive work environment. We have a variety of options available and you can even customize your work stations to exact specifications and get a quick quote all through our [Workstation Configuration Tool](#) on our website.
